## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1731

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over CARLSON et al.

See Carlson et al, column 4, lines 13-21 and lines 50-59, for multiple cycles of vacuum pressure, followed by overpressure. Each cycle adds beneficial liquor, e.g. debonding liquor containing a mild alkali (column 8, lines 63-column 9, line 4) to the cellulosic fibers, e.g. OCC, and the excess liquor is drained from the treatment chamber (column 9, lines 33-44). The second cycle would add additional beneficial liquor to the chamber. If the use of additional beneficial liquor is not taught by CARLSON et al, then CARLSON et al teaches adding a rinsing fluid or second type of treatment fluid prior to draining of the fluid and prior to removal of the fibers from the treatment chamber (column 9, lines 60-65). It would have been an obvious modification of CARLSON et al to rinse liquor or second treatment liquor prior to removing the beneficial (debonding) liquor.

Claims 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over CARLSON et al.

CARLSON et al teaches using overpressures followed by atmospheric pressures and/or vacuum pressures (see column 3, lines 25-63). The exact pressure would be a rate effective variable. It would have been obvious to choose the pressure differential depending upon the amount of impregnation desired and/or pulping desired as the amount of impregnation and pulping is directly related to the pressure differential between the high and low opressures. See column 3, line 41 for pressure reduction from superatmospheric to atmospheric pressure.

When filing an **"Official"** FAX in Group 1730, please indicate in the Header (upper right) **"Official"** for papers that are to be entered into the file. The **"Official"** FAX phone numbers for this TC 1700 are:
